About me:

Hi! I like noisy music, abstract art and clean code. I do Taekwon-do, play the piano and type at 120WPM. I studied **Industrial Design** at the **University of Buenos Aires**, but dropped out after self-learning web development for fun and finding myself busy with jobs in that field, where I thought I could find a reliable and fulfilling career.

Knowledge areas:

- **Backend** and **API** development
 - **PHP** development in **Laravel**, **Symfony** and **Codeigniter**
 - **JavaScript** development using backend and full-stack JS frameworks
 - Database creation and management in **SQL MySQL** and **PostgreSQL**
 - **Redis** caching
- **Frontend** development
 - **HTML/CSS/JS** layouts
 - Web design assisted by **Bootstrap/React/Angular/Vue/Tailwind & SASS/JQuery**
- **GIT** usage
- Working with **Docker** containers
- **Application** development
 - **C++** low-level development
 - **Java** and **Python** development
- Other
 - **Adobe** Creative Suite
 - **Google** and **Microsoft** office suites

Work experience:

Full-Stack web developer (2023 - currently)

Junior full-stack web programmer for PROVEEDORES DE AMERICA, where I'm part of a team maintaining existing, and developing new modules for the platform's e-commerce website.

Freelance web developer (2020 - currently)

I plan, design, engineer and maintain a variety of websites for various clients acquired through self-advertisement and word-of-mouth through friends and family.

Freelancer PC tech support (2019 - currently)

I use my experience in planning, building, using and troubleshooting computer systems to provide PC tech support to the home or business.

Languages:

- Native **Spanish**
- Native **English**
- Proficient **Japanese**
